This year, TECHNOLOGY!

Highly recommended by the New York Housing Association, Jim Spellos entertains while teaching.

During the morning session, **Hot Technologies 2018**, Jim will review what’s new and way cool in technology in a fun, fast paced look at what’s here for us to use now and what’s coming in the near future. After participating in this session, the learner will be able to:

- Identify the most critical tech tools of today
- Understand how to manage the flow of information and keep up with current technology advances
- Recognize new technologies that are changing how business is done

The afternoon session: **Are You Secure? (No, You’re Not!): Digital Securing and You**, is for **everyone**. Today’s high profile hacks of major organizations and institutions have increased awareness of the issues of digital security, yet most people are compromising their personal and company’s information on a regular basis, which can put their business... and themselves...at risk. Attendees at this session will better understand the digital risks, and learn to separate truth from hype about how secure their presence is.

- Identify critical terms about digital security for you and your organization
- Understand how to best keep your personal digital presence from being compromised.
- Identify over 5 tools that will greatly increase your online protection.
